

2nd Transnational Meeting

Start Date: 15/04/2019

End Date: 16/04/2019

Receiving Organisation: Srednja zdravstvena sola Ljubljana

Receiving Country: Slovenia

Receiving City: Ljubljana

Purpose and tasks of these meeting were to: Discuss/Analyze progressing results – MC report, present raw material (version in English - obligatory) for the Manual, Visit the teaching hospitals/ observe wound care dressing techniques/presentations/lectures..., Create photo/video material of Slovenian wound care dressing techniques during TM, present Cultural presentation and Divide tasks for the next TM Outcomes are: we agreed about issues regarding Manual - dates, technical issues about printing, reviews; we changed the date of a 4th TM and LTTA; we arranged the dates for sending mutual data regarding interim report . As a practical outcome - new dressing techniques were introduced in form of presentations and lectures (presenters were from: Biotechnical Faculty, University of Ljubljana (Larva wound treatment); MMSurgical (Negative pressure therapy; TOSAMA (benefits of Vivamel products); Dept. for Therapeutic Services of BTC (Amniotic membrane and platelet-rich plasma preparation), students were presenting their skills learning activities in school. In Senior home Škofijica all the benefits of light and laser therapy in wound healing process were presented too, as well as malignant wound care and all the specifics of malignant wound. Participants (vocational teachers from Croatia, Germany and Turkey with Slovenian Project team) expressed admiration for nurses that take care of patients with such wounds. From Croatia just one vocational teacher participated, instead of two, because Ms Suzana Ribarić was on a sudden sick-leave (NA was informed about and they approved the grant for that person could be transferred to another TM) and as observers there were Croatian coordinators of a Project.
